Release # 2.01

Ontario Onsite Wastewater Association announces its new Cottage Wastewater Seminar Program for cottage owners and cottage associations.

OOWA working with recognized cottage associations is prepared to participate at your local meetings to discuss the growing need for onsite treatment of wastewater in rural locations to help protect our water resources. Cottage Associations may contact OOWA to arrange participation by our members to inform and educate home and cottage owners on septic systems to protect their shorelines and the equity in their property.

Established in 1999, the Ontario Onsite Wastewater Association (OOWA) is dedicated to providing a strong Provincial Voice and access to a large network of Onsite Wastewater Professionals including Installers, Regulators, Designers, Engineers, Suppliers, Sewage Haulers, and Researchers/ and Academics, throughout Ontario. The Onsite Wastewater Industry is at the front line of development, ensuring the professionalism of the industry, and to ensure that the Ontario Government will continue to support onsite systems both conventional and those using technology as a viable permanent wastewater servicing option to protect our ground water, lakes, rivers, streams and environment.
